

Solstice Multi-Room

Mersive | 2017

Multi-Room Goals

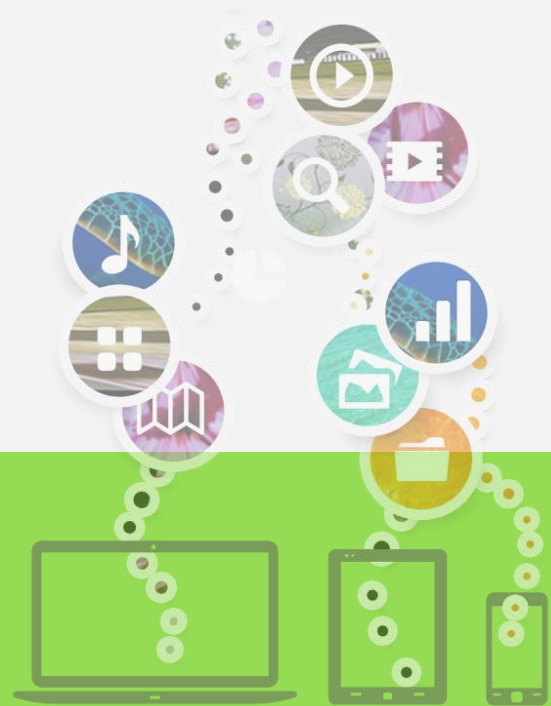

Provide the same Solstice experience, regardless of location

Focus on ease-of-use and modern meeting culture –
on-demand/real-time meetings
no requirement for specialized room

Leverage existing conferencing for voice

Leverage enterprise network

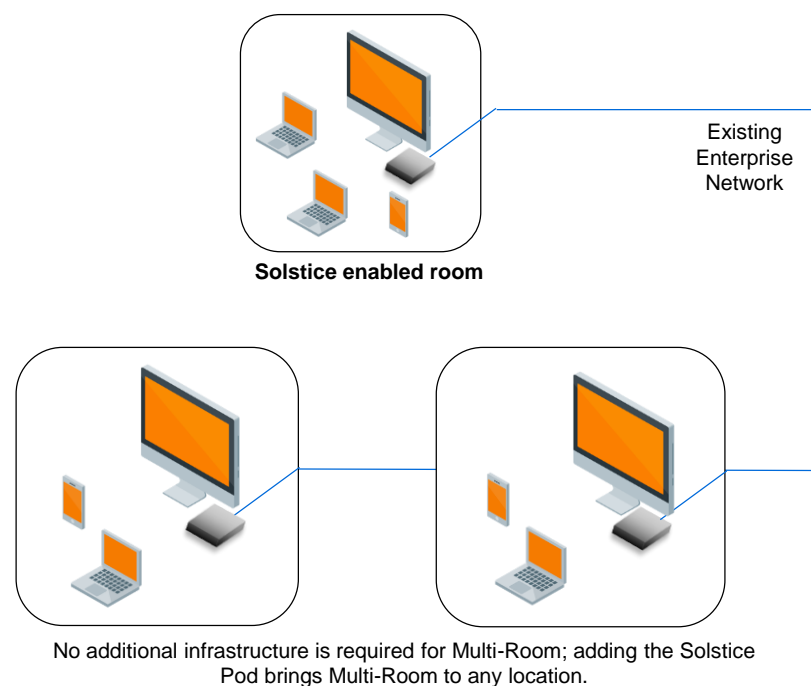

Mersive | 2017

Solstice, Room-to-room focus

Multi-Room adds room-to-room connectivity to Solstice bringing content-focused collaboration to the entire enterprise

- Adds on-demand content collaboration to any room across the enterprise
- Leverages existing network infrastructure and security investments to add room-to-room connectivity
- Same Solstice experience – linked between rooms
- No additional infrastructure, same client, add single Pod to room

Example Use Cases

Extends Current Meeting Methodology

Multi-team, multi-room meetings

- Start a session and invite others to join
- Other teams sync the session to displays that are convenient, creating a shared multi-room view into the collaborative session

Overflow rooms for larger presentations

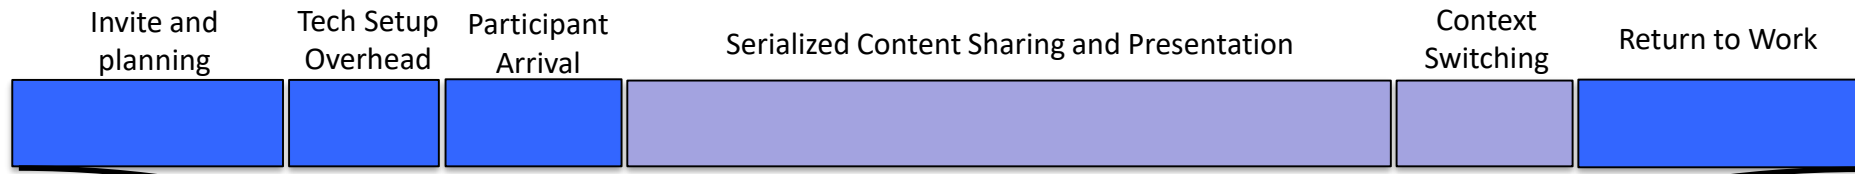

- Main room meeting/lecture is upgraded to session
- Overflow rooms are Sync'd to participants can view in real-time and interact with content as participants

Enables New Collaboration Methodology

Ad Hoc Collaboration Sessions

- Individuals or groups who are working together can start a session to 'announce' that it is available to others in the organization
- Users can view ongoing sessions, decide to collaborate/comment and sync the session to a nearby display

Traditional Meetings versus Solstice Multi-Room

Single button click to start and announce a Multi-Room session

No setup needed – familiar Solstice user-interface, any device is used to control Solstice Multi-Room session

Users can join Solstice from anywhere eliminating walks to 'specialized' rooms

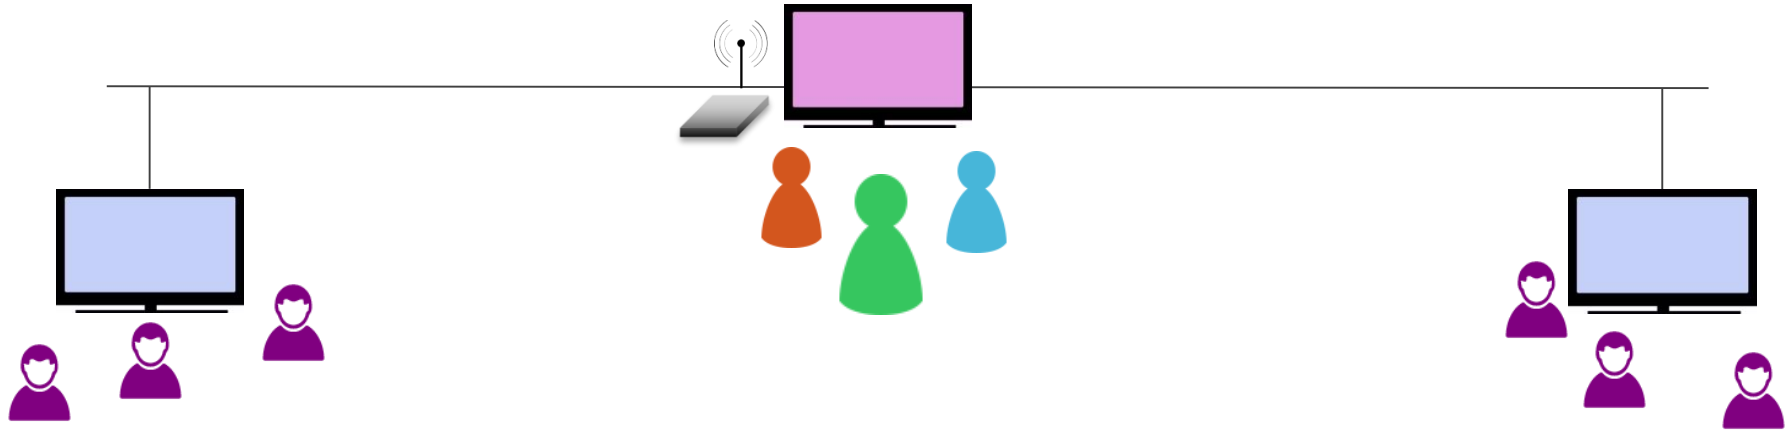

Collaboration, fast context switching, and multiple content sources in parallel leads to shorter meetings

Off-ramp from meetings is easier when they take place where you want

Solstice Multi-Room Features

- Any user connected to a Solstice display can start a Multi-Room session on demand
- Invite participants with the click of a button
- Presence and Availability for Meetings:
 - Discover live sessions in the client, where the session is underway and who has joined
- Sync any ongoing session to a Solstice-enabled room
- Same Solstice user experience while in a Multi-Room session –
 - Share media from any device into session, control sessions
 - Moderate incoming content regardless of location
- Content audio supported across all locations
- Integrated workflow to include a room or mobile phone for voice
- Solstice display shows which rooms are sync'd and in session

Live Multi-Room Demonstration
